Halloween Traits

The Featured Five

5 Trait Halloween Pack

Family-Friendly Edition · v1.0 · Spooky Season

by Rayne — The Seiðr Workshop

Five standouts from the full 20-trait Halloween pack: one for the graveyard, one for the candy route, one for the coffee shop, one for the full moon, and one for the grimoire shelf. All five are CAS Emotional traits for Teens and older in the pack's family-friendly line, each with its own always-on moodlet. Find them in Create-A-Sim, or add them with cheats. The tiles and word bubbles shown are the traits in-game, wearing their custom icons.

Install

1. Unzip HalloweenTraits-FeaturedFive-v1.0.zip, then unzip the five trait zips inside it.
2. Place the five .package files in Documents > Electronic Arts > The Sims 4 > Mods (one folder deep max).
3. Game Options > Other: enable Custom Content and Mods. Restart.

Important: these five are the standalone versions of traits that also live in the full Halloween Traits 20-pack — same tuning IDs. Install these five or the 20-pack, never both.

The five traits

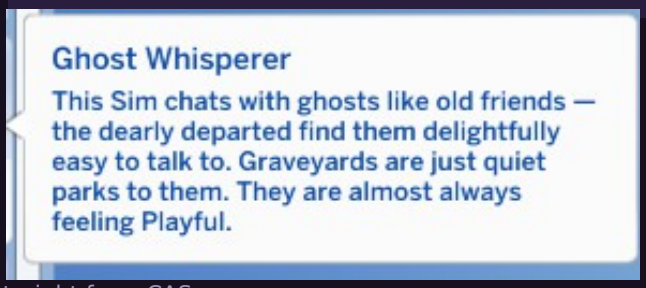

Ghost Whisperer

This Sim chats with ghosts like old friends — the dearly departed find them delightfully easy to talk to. Graveyards are just quiet parks to them.
